solo FX SE  
User Guide

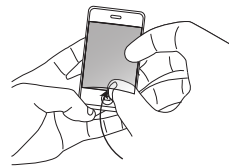

## Welcome

solo FX SE (for iPhone 4)

Thank you for choosing the iSkin solo FX SE to protect your beloved iPhone 4. This remarkably slim, sleek and low profile protector gives you more than just basic bumper protection. The solo FX SE's precision design perfectly encapsulates the iPhone 4 and helps to provide effective shock, impact and scratch protection from everyday use. We hope you enjoy using the iSkin solo FX SE with your iPhone 4.

### 1 Prepare Your iPhone

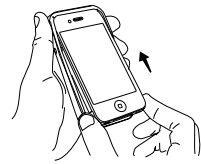

For optimal fit and performance, it may be necessary to remove any previously applied screen/body films from the iPhone 4 prior to using the iSkin solo FX SE.

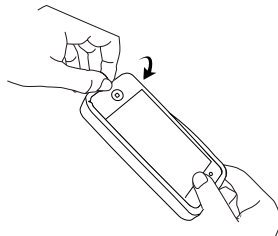

Gently and thoroughly clean your iPhone 4 using a soft, lint-free cloth, and remove all surface dirt or oil. Also ensure that you wipe the screen to remove any small dust particles.

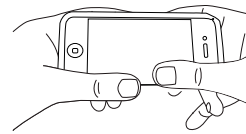

### 2 Placing the iPhone into the solo FX SE

Ensure that your iPhone 4 is turned off. Then, insert the iPhone 4 into the upper portion of the solo FX SE, as shown.

Next, stretch the bottom of the solo FX SE over the rest of the iPhone 4, so that the area around the screen of the iPhone 4 is covered.

If necessary, gently massage to align all edges and openings with the iPhone 4. This will ensure a perfect, snug fit.

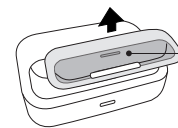

### 3 Cleaning

Over time, tiny particles may find their way in-between the iSkin solo FX SE and the iPhone 4. It is recommended that you completely remove the iPhone 4 and rinse only the iSkin solo FX SE with warm water to remove any buildup. **Dry the iSkin solo FX SE thoroughly before reinserting the iPhone 4.** In addition, wipe your phone using a Microfiber Cloth to remove any surface dirt before reinserting it into the iSkin solo FX SE.

Repeating this process from time to time will help keep your iPhone 4 looking great over time.

### 4 Docking the iSkin solo FX SE

The iSkin solo FX SE's slim design allows it to work with the Apple Universal Dock and devices that support universal dock design. To dock your iPhone 4 with the solo FX SE, remove any fittings that may be inserted into the dock allowing enough space to accommodate both the iPhone 4 and the solo FX SE.

Remove any fittings inserted into the Apple Universal Dock to accommodate the iPhone 4 with the solo FX SE. (See the user guide of the Universal Dock for instructions.)

### 5 FAQs

Q. What is the iSkin solo FX SE made from?

A. *The iSkin solo FX SE is made from a new-generation thermoplastic polymer that does not contain phthalates, lead or BPA's, making it a safe option for everyday consumer use.*

Q. Will the iSkin solo FX SE help with the antenna reception of the iPhone 4?

A. *The iSkin solo FX SE does help to improve reception by creating an insulated barrier between the antenna of the iPhone 4 and your hands, thus improving reception performance.*

Q. Why is there no screen film included with the iSkin solo FX SE?

A. *Apple has done an excellent job with the new retina display screen of the iPhone 4. Screen films tend to cause a reduction in the clarity of the display of the iPhone 4 as well as to inhibit the benefit of the oleophobic coating which reduces oil smears caused by your fingers and face. Screen films also do very little to effectively protect the screen of the iPhone 4.*

Q. How thick is the iSkin solo FX SE?

A. *On average, the iSkin solo FX SE adds a mere 1.6 mm of surface to the iPhone 4, making it an ultra-thin option for keeping your iPhone 4 looking great!*
