Experience solo

Thank you for choosing the iSkin solo to help keep your beloved iPhone 3G safe. The solo combines legendary iSkin protection with fashionable design and form-fitting, low-profile styling. Made from a flexible polymer, the solo is designed to offer iPhone 3G body protection without adding bulk or altering its aesthetic qualities. Designed to work with the iSkin revoClip 3G belt holster (sold separately), the solo also includes a clear screen film to help protect against screen scratches.

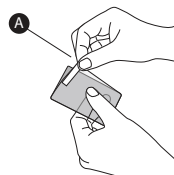

1 Prepare your iPhone 3G

Gently and thoroughly clean your iPhone using a soft, lint-free cloth, and remove all surface dirt or oil. Also ensure that you wipe the screen to remove any small dust particles.

2 Installing the Screen Protector

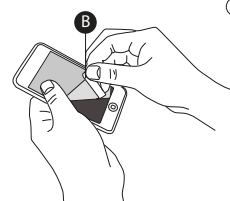

For best results, ensure your iPhone screen is free of dust particles and other impurities.

1 Peel away the plastic on "Side A" of the Screen Protector and reveal its tacking side.

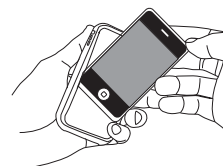

2 With "Side A" (the tacking side) facing the iPhone, evenly apply the Screen Protector. Rub the Screen Protector gently, from side to side, in order to remove any air pockets that may have formed during installation.

3 Once the Screen Protector is firmly in place, peel away the plastic on "Side B" of the Screen Protector (the side facing up). This completes the installation of the Screen Protector. **The included Screen Protector does not use adhesives, and can be removed anytime without leaving residue on the iPhone.**

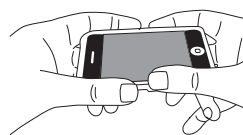

3 Placing the iPhone 3G into the solo

Turn the iPhone off. Insert the iPhone into the lower portion of the solo as shown.

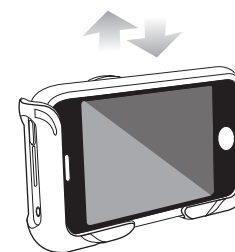

Stretch the solo over the top of the iPhone to cover all corners around the iPhone's screen area.

Massage the solo to a perfect fit, aligning all edges, controls and openings.
